

Boyang 'Boe' Zhou

Seattle, WA | zby2003@cs.washington.edu | (206) 532-6907 | linkedin.com/in/zby2003 | boezzz.com

Education

University of Washington, Seattle, WA
M.S. Computer Science

Anticipated 6/2026

University of Washington, Seattle, WA
B.S. Computer Science, Minor in Environmental Studies | GPA 3.96

9/2021-3/2025

Skills

Proficient programming languages: C++, C#, Java, Python

Other: R, Swift, PyTorch, NumPy, Three.js, Unity, OpenCV, TensorFlow, React, JavaScript, HTML, SQL, Linux, Git, Docker, OpenXR, OpenGL, RealityKit

Work experience

Software Engineering Intern - Asset Management

6/2024-12/2024

King County Department of Natural Resources & Parks | Seattle, WA

- Published new Lucity GIS features connecting geospatial databases with county demographic data, enhancing the accessibility and equity of the park and trail system

Software Engineering Intern – Agentic AI

6/2023-9/2023

Hugsi | Bellevue, WA

- Integrated the OpenAI API into the Hugsi iOS mobile app, developed using Flutter and connected to a NoSQL database, enabling the generation of personalized travel itineraries based on user preferences

Research experience

Researcher - Augmented Reality & Accessibility

9/2024-Present

Makeability Lab, Paul G. Allen School of Computer Science & Engineering | Seattle, WA

- Research the utilization of spatial anchors and visual cues to enhance runners' experiences on Vision Pro
- Accelerate YOLO model performance to run locally on an iPhone at 60fps, enabling low-vision individuals to watch soccer games with visual augmentation

Researcher - Augmented Reality & Computer Graphics

6/2022-12/2024

UW Reality Lab, Paul G. Allen School of Computer Science & Engineering | Seattle, WA

- Published a **second-author paper** at ICLR 2025 "Generative Inbetweening: Adapting Image-to-Video Models for Keyframe Interpolation"
- Fine-tune diffusion-based video generation models on High-Performance Computing clusters
- Implemented an image-to-mesh pipeline in Python powered by U-Net, a Convolutional neural network, to reconstruct raw CT and MRI scans into annotated 3D meshes of the lumbar spine

Leadership experience

Grant and Project Coordinator

6/2023-Present

University of Washington Sustainability | Seattle, WA

- Manage and mentor **over 50** sustainability-related projects funded by the Campus Sustainability Fund, including solar infrastructures, transportation projects, and Environmental Justice seminars

President

11/2022-Present

Extended Reality Association at the University of Washington | Seattle, WA

- Lead a **team of 7 officers and over 150 student** to build an interdisciplinary Extended Reality community in the Seattle area through hosting technical workshops, speaker series, and hackathons
- Fundraise over \$60,000 to purchase student-accessible Vision Pros and Quest headsets
